Our LVT Services

Security

Professional grade service, that is what we provide. Systems come with professional service provided by best-in-class Authorized Dealers and are backed with 24/7 professional monitoring. With over a decade of experience delivering security solutions, award-winning and patented technology, and millions of users, you can be confident in your choice.

Access Control

Our access control systems perform authorization identification, authentication, access approval, and accountability of entities through login credentials including passwords, personal identification numbers (PINs), biometric scans, and physical or electronic keys. Knowing the best software possible to keep up a house or office security on-the-go, LVT specialist will get it all set up with little to no problem.

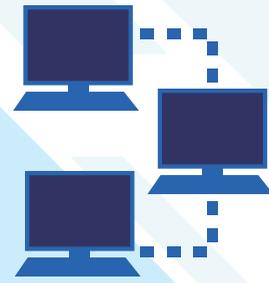

Fire Systems

Liquid Video Technologies assist builders with all the challenges of assuring business owners have the best fire control systems available by subcontracting to the qualified team at Liquid Video Technologies.

Surveillance

When 52% of all residential burglaries taking place during the day when nobody's home, cameras are one of the best ways to identify and catch burglars nowadays. Security cameras are a key component in home system security, and LVT specialist are here to help you every step of the way.

Networking

LVT offers a broad range of knowledge base to support both voice and data architecture. Franchisees and small business owners are dependent upon a fully integrated data network that assures POS transactions, day-to-day operations, customer friendly WIFI access and remote login to the surveillance system.

Automation

Not knowing what Automation is? Well, we got you covered here at LVT. We have the technology, after installing them, that easily process any procedure that is performed without human assistance. Setting it up in your home is helpful when trying to deal with many other things. These things could easily help control your telephone networks, heat treating ovens, electronic devices, and the temperature of your house.

Audio/Video

Having video is important, but having audio is more important. Most video cannot capture the person's face, but the audio could always capture the voice. This will provide more evidence for finding the culprits, and LVT is here to help you secure your office or home. We have specialists on hand to know that your audio is working perfectly on every device. Knowing that LVT will get the job done with the security you need.

FOR YOUR HOME

More than 2.1 million burglaries were reported in the United States in 2012. That's one every 15 seconds, according to the FBI, proving just how easy it is for burglars to gain entry.

Full automation of your home's devices and systems is the wave of the future. Already, these new, "smart home" technologies have made it to nearly every component of the home—from the lights to the thermostat—intelligent and automated. By linking of these systems together with whole-home automation software from one of the top-of-the-line brands such as Creston, Control 4, and Savant, you can experience home control like never before. All available to you by remote mobile control from one single application, allowing you to turn on the lights, adjust the temperature, and lower the shades all at the same time, wherever you happen to be. Or, you can create custom programs and settings, such as "Work" or "Vacation" that adjust all of the elements of your home for you while you're away, either for just a few hours or for an extended holiday.

**A home should
BE SECURE.**

**Because security is
your biggest company asset.**

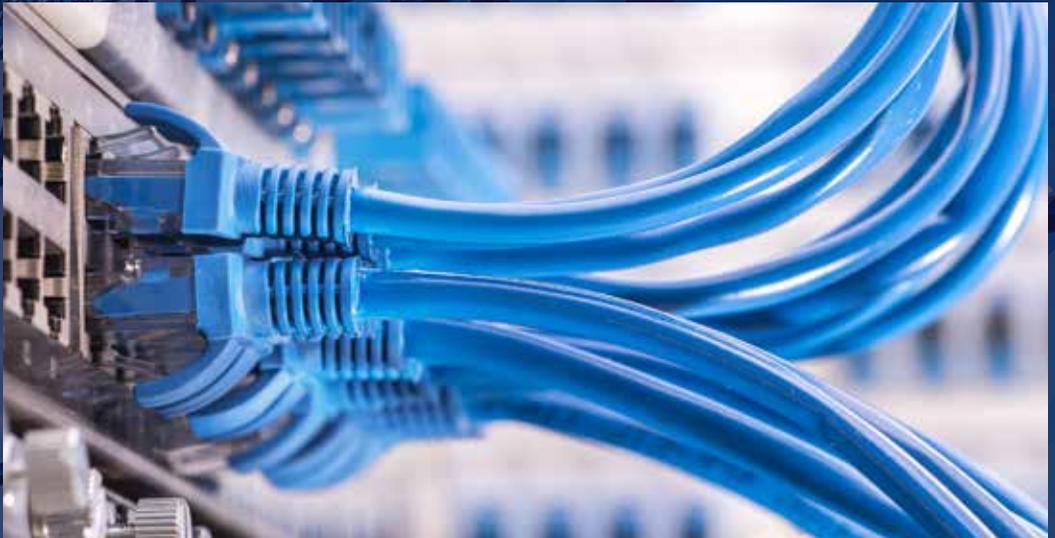

FOR YOUR BUSINESS.

Having the best security system in your office is very crucial to your expansion. Networking together digitally to boost up the communication needs security. Surveillance and access control helps defend your company well with break-ins. LVT understands the your corporation is top priority to your advancement, and we are there every step of the way.

Small Business Networking

Just one of the services we offer.

Needing your small office to have the best networking system in the Upstate? Well, LVT has you covered with the best equipment possible to give you great communication between employees and clients. The services we provide will assure that all will work directly and intact with no problems to your business. If you have any questions about this type of service, you may contact us to further answer your needs.

WE UNDERSTAND CONTRACTORS.

BONDED AND INSURED

The majority of construction workers carry out through contracting processes whereby the construction firm wins the contract to complete work in exchange for money. We can help better optimize the results when dealing with the role of contractors and subcontractors in making the work process drive through smoothly. Being a contractor is similar to being a business owner, which would likely be paid more for work than being a worker because of the effort of finding customers. Therefore, any profit from contract work belongs to the contractor.

Networking Infrastructure

LVT has you cover here. Network infrastructure is needed to keep up connectivity, communication, operations and management of a company. This could also expand your the business into a corporation. LVT specialist works closely with other subcontractors to assure the data infrastructure is fully functional and ready to support your operations and the demands of your clients.

Fire Safety

Having the state of the art Firelite Alarms by Honeywell will give you sense of security throughout each day. Our LVT specialist know how to get your home, office, or shop secure with workable fire alarms in case something has caught fire.

Access Control

Working with LVT will give you the best access control in the Upstate. Knowing you are needing more security to protect your home, office, or shop is what we strive for.

Surveillance

LVT offers state of the art solutions that are customized to meet the objectives and requirements of the final client. We strive to educate potential clients to assure they understand our offering as well as the trends in the market place and how technology can work for them. The IT and surveillance markets are merging and your ability to manage remotely is expanding. Whether utilizing a desktop, laptop or PDA, you are never more than a click away from observing your facility. Our technicians on site training and programming award you the knowledge to maximize your systems potential to facilitate managing your assets and limit your liability.
